

Winery ENERGY SAVER Toolkit

**Register
for a free
information
session**

Looking for ways to reduce your energy costs?

The *Winery Energy Saver Toolkit* (WEST) has been developed by the South Australian Wine Industry Association (SAWIA) in partnership with Zero Waste SA to help wineries identify opportunities and improve their energy efficiency.

SAWIA invites you to register for an industry-specific information session to learn about the new *Winery Energy Saver Toolkit*.

Hear how you can quickly identify the key opportunities in your winery, and how to prepare a business case to get started with implementation and begin saving energy and money.

Find out more about applying for funding under the Federal Government's *Clean Technology Food and Foundries Investment Program*.

Session program

The 'WEST' – About the toolkit Where to get it, How to use it

Mark Gishen SAWIA
Nick Palousis, 2XE

Energy savings – Key opportunities Developing the business case

Nick Palousis, 2XE

Networking and light lunch
